Reading

You may love one food more than others, but the best choice is to eat a variety of foods. If you eat different foods, you're more likely to get the nutrients your body needs. Taste new foods and old ones you haven't tried for a while. Some foods are more pleasing as you get older. Eat enough fruits and vegetables. Drink water and milk most often. When you're really thirsty, cold water is the number one choice. Kids need calcium to grow strong bones, and milk is a great source of calcium. You probably will want something other than milk or water once in a while, so it's OK to have 100% juice, too. But try to limit sugary drinks. Listen to your body. What does it feel like to be full? When you're eating, notice how your body feels and when you feel comfortably full. Sometimes, people eat too much because they don't notice when they need to stop eating. Eating too much can make you feel uncomfortable or sick, and over a period of time, **it** can lead to an unhealthy weight.

K

3.5

40. Why should we eat a variety of foods?
.....

41. What is the great source of calcium?
.....

42. The pronoun "it" in the last sentence refers to
